September 2015

Dear Friends,

I am pleased to introduce the 2015 Colorado Agricultural Statistics Bulletin. This book offers valuable data that not only provides a current snapshot of Colorado's agricultural industry, but helps shape the future.

This information is used by producers, legislators, and decision makers to help make choices on issues facing today's ag community. As a lifelong farmer and rancher, I understand the importance of solid, comprehensive statistics to help make informed choices that affect the development of your operation.

As one of the top economic sectors in the state, the Colorado Agricultural Statistics Bulletin is instrumental in showcasing the wide variety of commodities produced in this state.

The Colorado Department of Agriculture is dedicated to promoting agriculture on the local, state, national, and global levels and consider these statistics a valuable resource in that effort. Our Department offers a variety of resources to help Colorado's agriculture industry, and I encourage you to visit www.colorado.gov/ag to learn more.

I encourage you to peruse the important data found within these pages and utilize it in your efforts in contributing to the betterment of Colorado agriculture.

I would like to thank CASS, the National Agricultural Statistics Service, and all of the farmers and ranchers who make this book possible.

Sincerely,

Don Brown
Commissioner

The Colorado Agricultural Statistics publication is compiled by the Colorado Agricultural Statistics Service, which is an agency within the U.S. Department of Agriculture, in cooperation with the Colorado Department of Agriculture.

National Agricultural Statistics Service**

September 2015

Dear Friends of Agriculture,

In 2014, Colorado agricultural producers had over \$7.5 billion worth of farm gate cash receipts, second only to 2012. Net farm income was estimated at \$1.13 billion. These numbers alone show that agriculture is such an important industry in Colorado that it is critical to have sound information about it to show its value and be able to make good decisions for it.

Therefore, I am pleased to present the 2015 Colorado Agricultural Statistics Bulletin made available through the Mountain Regional Field Office of USDA's National Agricultural Statistics Service in cooperation with the Colorado State Department of Agriculture. The estimates available in this bulletin and what our office publishes throughout the year are valuable tools for the producer and the agricultural industry to make sound decisions. This information is used for marketing decisions, planning, research, insurance and disaster programs, and policy decisions.

Thank you to the farmers and ranchers for taking time out of their busy schedules to provide the data needed to produce these statistics. I also want to thank all the agribusinesses, extension educators and USDA's Farm Service Agency for contributing information for this bulletin and providing support for our programs.

This report would not be possible without the dedicated effort of field and telephone interviewers who collect this data and the office staff that compiles it. I would like to thank Travis Harvey for the cover photography, and a special thanks to the Colorado Department of Agriculture for covering the costs of printing this bulletin.

Sincerely,

William Meyer
Director

1/ The seventeen states include: AZ, CA, CO, ID, KS, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, and WY.

PRICES RECEIVED BY FARMERS

Prices received by farmers and ranchers provide a basis for calculating the income from the Agricultural Sector as part of the National Income Accounts. These data are also extensively used to analyze past and current marketing patterns and to make current and future marketing decisions. Prices received for major farm commodities are used in computing the Index of Prices Received by Farmers, an important indicator of the economic environment of the nation's agricultural producers.

Marketing year average prices, by commodity, Colorado, 2006-2014

Commodity	Unit	2006	2007	2008	2009	2010	2011	2012	2013	2014
